

## Managing Security Risks in the Oil & Gas Sector

This course is designed specifically for those who need to understand the complexities and differences of managing security in the oil and gas sector.

The energy and extraction sectors face continual challenges from man-made threats and natural hazards.

Drawing on case studies from around the world, the training course addresses some of the more complex risks associated with the oil and gas industry in a range of environments and examines the risks in Upstream-to-Downstream operations.

Delivered by trainers with extensive operational security management experience in the Oil and Gas sector, the course examines and develops risk management theory and applies this to the modules delivered. Successful learners will earn a QNUK Level 4 Endorsed certificate.

Utilising elements of the ANSI-API STD 780 Security Risk Assessment Methodology and additional resources, the course highlights the spectrum of risk elements that have the potential to impact upon security management operations, experienced by security practitioners in the sector.

### WHO WILL BENEFIT

The course will be of immediate benefit to anyone currently involved in managing risk and crisis within the oil and gas sectors. Furthermore it will benefit operations and facilities managers who may have a vested interest in the sector. This course will equip the learner with the essential measures required to maximise safety and security during a crisis, whilst meeting the realistic constraints of the organisation's budget

### COURSE INFORMATION

#### QUALIFICATION

Level 4 (QNUK Endorsed)

### Core content

- ❑ Security risk analysis in oil and gas sector
- ❑ Corporate social responsibility, human rights, and community management
- ❑ Managing activism risk
- ❑ Managing acts of militancy and terrorism against the oil and gas sector
- ❑ Oilfield and pipeline security
- ❑ Refinery security
- ❑ Maritime and offshore security
- ❑ Downstream (retail security)

This sector-specific programme is intended for security managers or consultants in the oil and gas industry, or those seeking work in this sector. Participants should have a baseline level of security management knowledge.

If you'd like to discuss this course and how it may fit in with your training plans, our team of security training account managers are here to support you.

All courses can be delivered on an in-house basis, directly to your team at your location. Get in touch to discuss this option.

“

All of the course was useful particularly the pipeline offshore security management.
